

# TUBE TARP

Ultra Lightweight and Compact

## Read all instructions before setting up tarp.

Choose an area to set up the tarp that is level and free of rocks, debris, and sharp objects.

### CONTENTS

**A** Tarp Canopy (shown folded)

**B** Outer Stuff Sack

**C** (6) Steel Stakes

**D** Stake/Guy Line Stuff Sack

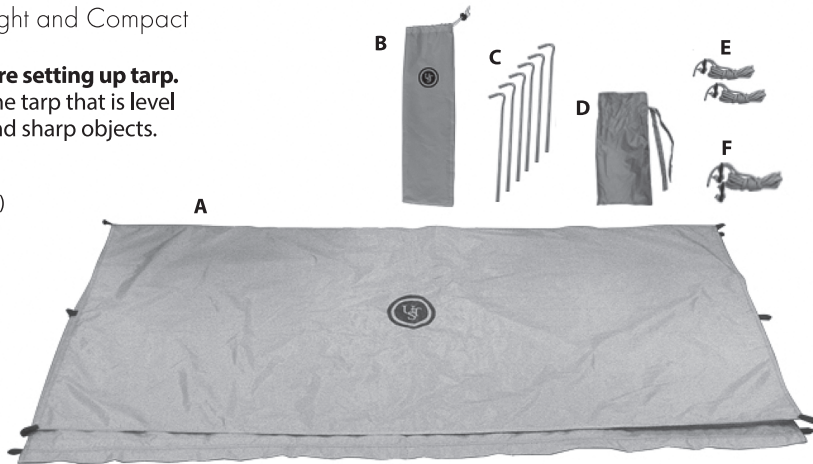

**E** (2) Single Adjust Guy Lines

**F** (1) Dual Adjust Guy Line

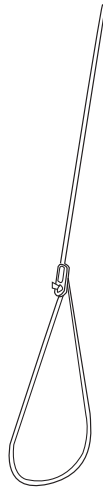

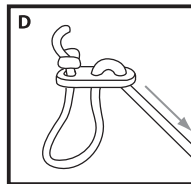

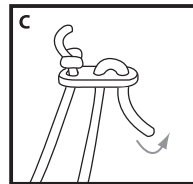

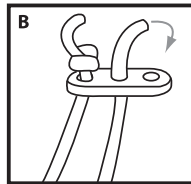

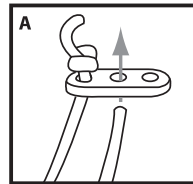

### Note:

Use single adjust guy line for tarp corners and dual adjust guy line for center.

Model No. 20-12150

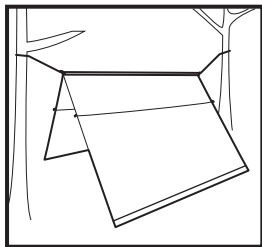

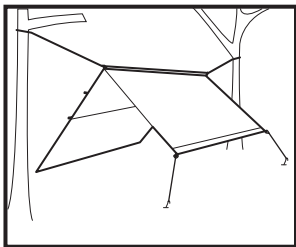

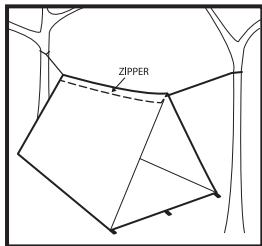

1. Tie a bowline knot on the end of the line and loop opposite end through the line tightener as shown below.

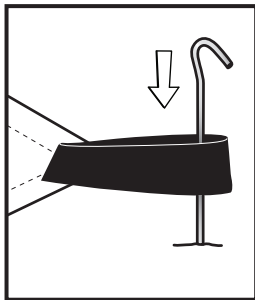

- 2.** Suspend tarp in one of the configurations shown, using trees to secure lines.

Note:

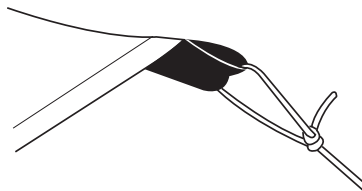

When using as a tube tent, be sure to orient zipper so flap fully covers zipper and prevents leaking.

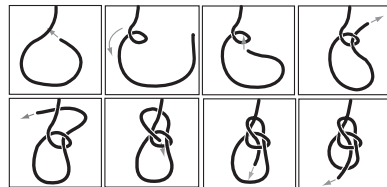

- 3.** Position the tarp on the ground. Secure down corners of tarp using the hooked end of the stakes. Keep tarp pulled tight during staking.

- 4.** Tie opposite line end to loop on corner of tarp using a bowline knot shown below:

Tying a bowline knot

## Care Instructions

Take good care of your Tube Tarp and it will take care of you:

- Clean tarp with mild soap and warm water after each use. Removing pine pitch and other dirt will extend life of the tarp.
- Dry tarp thoroughly prior to storing. Store in a cool dry place.
- Avoid extended exposure to direct sunlight as UV rays will deteriorate materials over time.

**LIMITED LIFETIME WARRANTY**
